

This speech by Schneerson was published in the Vologda newspaper Slavyanin, N-4(32), 2001. After the publication, the court could not "stitch" the 282 article to its editor V.F. Popov, because he operated on the facts, and Russian scientists Academician Yu.K. Begunov and Doctor of Law O.G. Korotayev stood up for him.

The speech was made in 1994 by Chabad Rabbi Menachem Schneerson, who also declared himself "Mosiah" (anti-Christ). You can argue a lot about its reliability, as once argued about the reliability of the "Protocols of the Elders of Zion", but it is undeniable that almost all the goals and objectives voiced by Satan, today have already been solved.

Therefore, until the majority realizes that our people are under brutal occupation, we must spread the truth about the plans of the occupiers everywhere.

"And the Slavonic fleet we will drive far to the North..."

Words of Rabbi of the Sanhedrin Rebbe Menachem Mendel Schneerson, Chabad leader (died 1994)

The "Goddess" Plan

1. Our special tactics of dealing with red-browns (and all Slavs are red-brown) are, by virtue of their isolation, Secret Knowledge. The main thrust of the struggle will be directed against the Slavs, except for the renegades, who are related to the Jews by the same interests. True, these "born" we then, after using them for their own purposes, will withdraw from our society. The Slavs, and among them the Russians, are the most rebellious people in the world. He is rebellious because of the warehouse of his mental and mental abilities, laid down by many generations of ancestors, genes that are not amenable to alteration. A Slav, a Russian, can be destroyed, but can never be conquered. That is why this seed is subject to elimination, and at first - a sharp reduction in its number.

2. Our methods of struggle will not be military, but ideological and economic with the use of power structures equipped with the most modern types of weapons to physically suppress the rebels with even greater cruelty than was done in October 1993 when the Supreme Soviet of Russia was shot. First of all, we will dismember all the Slavic peoples (300 million of them, half of them are Russians) into small weakened countries with interrupted ties. Here we will use our old method: divide and conquer. We will try to pit these countries against each other. Involve them in internecine wars for the purpose of mutual destruction.

The Ukrainian will think that he is fighting against expansionist Russia, fighting for his independence, will think that he has finally gained his freedom, while he is completely dependent on us. The same will be considered by the Russians, as if they defend their national interests, return "illegally" taken their land, and so on. All this we will do under the pretext of different sovereignties, the struggle for their national ideals. At that time, we will not allow any of the parties to self-determine on the basis of national values and traditions. In this war of fools, the Slavic cattle will weaken themselves and strengthen us, the main conductors of the unrest, allegedly standing aside and not only not participating in the bloody events, but also not interfering in them. Moreover, we will completely protect ourselves. In the consciousness of the Slavs-profanes (the uninitiated), we will lay such stereotypes of thinking, in which the most terrible word will be "anti-Semite". The word "Jew" will be whispered.

In several trials (such as the trial of Ostashvili's "anti-Semite" with its subsequent destruction) and other methods (radio, television – frightening films, such as the revenge of the Israeli superintelligence Mossad for the murder of Jews) we intimidate cattle so much that not a single Jew will fall from his head, while the Slavs will be shot in packs, destroyed by thousands – on the borders where Jews do not serve, in peacekeeping forces, terrorism, contract and criminal murders.

3. The stupid Slavic ethnos does not understand that the most terrible fascists are those who never, anywhere speak aloud about this, but organize everything supposedly according to the most democratic norms (as an example, imitation of "elections" in Russia, in the USA, where the cynicism of the system is distinguished only by its "worked out" – Ed.). On the contrary, we will make the very word "fascist" offensive. This label will be feared by everyone we hang it on. We know very well that nationalism strengthens a nation, makes it strong. The slogan of "internationalism" is outdated and no longer works as before, we will replace it with "universal values", which are the same thing.

We will not allow any nationalism to rise, and those nationalist movements that seek to lead the people out of our dictates, we will destroy with fire and sword, as is done in Georgia, Armenia, Serbia. But we will ensure the full prosperity of our nationalism - Zionism, or rather: Jewish fascism, which in its secrecy and power is superfascism. It was not for nothing that the UN General Assembly in 1975 adopted a resolution in which it defined Zionism as the most notorious "form of racism and racial discrimination", but due to our victorious march throughout the planet in 1992, it canceled this decision. This international body we have made a weapon of our aspirations to seize power over "all kingdoms and peoples."

4. We will deprive a large population of Slavs of the national elite, which determines the development of events and the progress of the country. And, ultimately, the whole story. To do this, we will lower their educational level - in the next 5 years we will close half of their institutions, and in the other half we will study. We will let more Armenians, Chechens, Gypsies and the like there. We will ensure that the governments of the Slavic countries have as few indigenous representatives as possible, who will be replaced by our Jewish elite. In the mass media – radio, television, the press, art, literature, theater,

cinema – we will gradually displace national cadres, replacing them with our or, in extreme cases, cosmopolitan ones.

Humanization of education will be carried out, as a result of which the objects that structure the thinking of the left and right hemispheres of the brain will be reduced and destroyed:

(a) Language and literature,

Physics and Mathematics [5].

Nothing to say about history. We will give our view of history, where we will show that all human evolution was moving towards the recognition of the God-chosen nation of the Jews as rulers over the whole world. In return for national values, we will give you the patriotism of balalaika and drunken tears. And here our goal is to replace the red-brown elite with ours.

We will not allow the development of science in these countries. And the core of scientists (Academy of Sciences) will consist of their people. We will not allow any high technology, which will lead to the complete decline of industry, which we will narrow down to the production of basic necessities for a limited contingent of slaves who extract raw materials for us. Among the townspeople there are many engineers, skilled workers, teachers. We will create such conditions for their survival (without a place of work, high rent, utility fees, travel) that they themselves will flee, as the Russians are now fleeing from the CIS countries, to the remote villages of the north, where they will find it easier to live, which in fact will also be a deception.

Unleash the youth - and you will defeat the nation ! That is our motto. We will deprive your society of youth, molesting it with sex, rock, violence, alcohol, smoking, drugs, that is, we will deprive your society of the future. We will hit the family, destroy it, reduce childbearing. Hitler was a silly boy. He acted directly, openly. And had to do an incredibly great job - millions to burn, shoot, bury and the like. He left bloody footprints. We act more cunningly: we will not have traces. To reduce childbearing by at least half is to destroy 2-3 million Russians a year without any physical costs. No stoves, no bullets, no graves. And there's no trace. Not born. There are no culprits. We will create better living conditions for criminals than for a working ark, we will release criminals from prisons so that there will be more murders, robberies, instability. Amnesty will apply only to thieves and murderers, in short, all except those convicted under the article for "inciting ethnic hatred", which replaces the law on anti-Semitism. Sowing fear among the people. Fear for a life that will cost nothing, fear for a job that can be taken away every minute, fear for the future of your business. Fear and rule.

5. These ambitious objectives will be implemented in several phases. Already 85% of the shelf of the Arctic Ocean was (wide circles of the population are not yet aware of this) in our hands, thanks to confusing and not explained to the people agreements concluded under Gorbachev and Yeltsin. Already now, 1.5 million Armenians live on the lands of southern Russia - this is our outpost. At first, for deception, we will declare the Armenian Republic in the Kuban, then, having expelled the Cossacks, we will transform it into Khazaria - Israel. What will help us is that the Cossacks are constantly drunk, love power and are ready to fight each other on this ground. However, there is another structured organization - the Orthodox clergy. We will send our Jewish representatives there as priests, who, according to the Talmud, are allowed to externally perform the rituals of other religions, keeping their faith of Judaism in their soul. We'll bribe the others. Those who do not give in will be destroyed. Russians no longer have more or less organized structures, and cattle are not able to unite and create them, because Russian cattle have already been drunk and degraded and are not capable of structuring.

We will drive all mountaineers to where they should be - high in the mountains. At the same time we will cut off the Russians from the East with the help of the Great Arc. A confederation of free peoples "Itil - Ural" will be created, cutting off the Urals and Siberia from Central Russia (Komi, Komi-Permian Republic, Udmurtia, the great Tatarstan, Bashkortostan and the Republic of Volga Germans created by secret agreement with Germany). Then the arc will pass below Kalmykia, Dagestan, Azerbaijan, will collide with Turkey. And beyond the Urals - everything is simpler: sovereign, freed allegedly from the Russian yoke of Sakha, Chukotka, Buryatia ... We will create such an intolerable situation there that the national minorities themselves will ask "Western society" to protect them from the bloody Russian colonialists.

If in the last century the United States bought Alaska from Russia, then in the 21st century it will buy Siberia completely. This will include Siberian territories between the Yenisei in the west, the Arctic Ocean in the north, the Pacific Ocean in the east and the borders of China, Mongolia and North Korea in the south. This area is twice the size of the United States itself. An acre of land will be bought at a price of \$ 1,000, for the whole of Siberia will have to pay \$ 3 trillion over 20 years. Annual payments will amount to \$ 200 million, half of which will be spent on the purchase of goods in the United States. Siberians will not get away from the fact that they will have to submit to some foreign influence, and the United States looks more pleasant than its Asian neighbors. After all, Vladivostok is closer to Los Angeles than Moscow.

6. In order to carry out all these important events for us, under the guise of "democratic transformations", we will give the Slavic Bydl a monarchy. Everyone is a puppet president. And more shine, noise, pump ! Monarchism is good in that all the energy of the masses directs to the whistle. It distracts from our secret active work of structuring the population according to the pattern we need. The president is a screen, like elected by the people (and we will fake election procedures so that everything seems legal), because of which we will manage all the necessary processes. The President will have unlimited powers. By reshuffling personnel at the highest posts of power structures, he will put our people at the head of them. The army, the Interior Ministry, the FSB and all kinds of special forces will

be directly subordinate to the president. Which means us. We will have only the ropes that go to the hands of the president. And we will pull these strings as necessary to carry out the grandiose plan of conquering all tribes and kingdoms, subjecting them to our super-people, chosen by the God of Israel.

7. But the main thing is money. They do everything. They are power. They are power. Whoever has the money has the weapon. Supermodern. He has a mercenary army. Money owns media fooling billions of human cattle. They bribe the right people. Remove the disobedient. Bomb resisting fans - Iraqis, Serbs, in the future - the Russians. Capital and the seizure of power decide everything. Over the accumulation of capital and the seizure of power, we have been practicing for more than three millennia, and no one is stoking us in this matter. You don't have your own money. The authorities too. You don't have them and won't ! Won't give !

We hate you immensely ! This hatred gives strength to smile cutely in your face, infiltrate your credibility and guide you by showing "care" for you and your children, future grandchildren and great-grandchildren who will not actually show up.

You're doomed. And until you understand this simple truth, until you twitch, until then you will be beaten more than you should. If you are obedient, you will be left with 65-70 million units, otherwise - 40-45.

The main thing now is to keep us for at least another 2-3 years. And then there will be no problems for us here in this country. We will create such protective equipment that none of you will walk. Everything we know will be controlled and secretly controlled. And no one can stop us !

WHAT ARE WE DOING

1. World stocks of industrial raw materials are dwindling, and by the beginning of the next millennium "Western society" will not be able to maintain its current level of consumption without feeding from new sources – colonial donor countries. Therefore, our aspirations are now directed at Russia with two goals: the first is the elimination of the most powerful and independent empire, occupying one sixth of the earth. The second is the seizure of its wealth, which accounts for 60-70% of all world reserves of raw materials and 75-80% of the world's open oil and gas reserves, concentrated in Siberia and on the shelf of the Arctic Ocean.

2. The planet is experiencing intense climate warming. The desert moves north at a speed of 10 km per year, dehydration of the earth - 25 m per year. Already, the ancient centers of the world - Athens, Rome and, most importantly, Jerusalem (Israel) fall into the zone of only artificial irrigation. In 20 or 30 years

we will have to think about the resettlement of vast masses of civilized peoples north of their present residence. By that time, in the Kuban, in the Rostov region, in Ukraine there will be an amazing subtropical climate, and in the Black Earth and in the north of Ukraine - the climate of today's Transcaucasia. If we recall history, we must admit that these lands are the ancestral lands of the ancient Jewish Khazaria, that is, Israel, captured by Kievan Rus in the 10th century. Slavs here are temporary guests and are subject to eviction. We will return this territory and create a great Khazaria on these fertile lands, a Jewish state, just as Israel was created 50 years ago, having supplanted the Palestinians. Part of the Israelis will move here, and we will drive the Slavic cattle far north, beyond Moscow. There will be a small northern territory – a reservation with a compact population, a reservation similar to the Indian in America.
